

EBB & FLOW

Room for personality

To A-spire

The ebb and flow of life is a constant change of direction, to slow down or speed up, to look back in time and into the future.

So the brand new A-spire lamp design from EBB & FLOW is a delicious cocktail of just that, a fusion of vintage, 1970s retro and forward-reaching.

A linear silhouette that puts brushed brass and glass together in a true expression of Scandinavian design, A-spire has the scope to embrace sleek with earthy and organic.

A simple design that looks equally at home in a private home or a smart hotel.

“I took inspiration for the shape of A-spire from a lamp that hung in my parents’ bedroom in the 1970s, it had 3 metal tubes inside each other. The lamp is long gone, no photos exist, but for the ones in my head”, says Susanne Nielsen, EBB & FLOW founder and designer.

The name A-spire is two-fold, it is statuesque like a spire, and at the same time is a little twist on words to signify aspiration, in this case our aspiration, to deliver a beautifully designed lamp.

About EBB & FLOW

We are a brand of personality. A brand of liberation and meaningful interior design. EBB & FLOW is not driven by fashion or trends.

We design decorative lighting that adds character and personality to any space. Design that lasts for years. We specialise in decorative and innovative lighting and have recently expanded our collection with exclusive crystal bowls. A modern collectable.

All products are designed by our Founder and Designer, Susanne Nielsen. Inspired by perfume bottles, jewellery, and British antique markets, all products are designed focusing on organic shapes, proper raw materials, and an eye for detail.

The collection holds everything from simplistic and elegant designs to sculptural statements. Choose between table/floor lamps, wall lamps, pendants, surface lamps, and fabric lampshades produced by hand in glass, crystal, brass, and luxurious fabrics.

Handmade production is at the heart of EBB & FLOW. All products are produced by hand in Europe using traditional craft methods. We celebrate uniqueness, impressive craftsmanship, and the individual story of each product.

With a wide collection of lighting in different colours, shapes, and sizes, we encourage you to let your personality shine.

Handmade

Designed in Denmark and produced in Europe, all EBB & FLOW products are handmade. Glass, crystal, brass, and textile are designed, shaped, coloured, and cut by hand to be assembled into the finished EBB & FLOW product. Impressive craftsmanship ensuring high quality and exclusive products. We celebrate the uniqueness and the personality of handmade production.

Flawless is for diamonds, to the rest of us an illusion

Just like a flower or a loved one is beautiful because of their so-called flaws, not despite them, we too celebrate the uniqueness in the glass and crystal products we design and produce. We strive to make it the best version of itself, give it beautiful curves and lines, using the best craftspeople in Europe. Instead of lamenting the fact that our lamps and vessels will never be flawless, we celebrate them for their personality and lack of uniformness.

The art of glass blowing

It takes four to five craftsmen or women to blow and shape an EBB & FLOW lampshade. Before reaching the production stage, there is a long process of drawings, mould-making, and sampling, until finally the finished product is approved and ready for production. EBB & FLOW glass is blown as clear glass, and the next stages of production involve polishing and hole-drilling. Eventually, the shade is hand-coloured, and the colour is burnt onto the glass.

A centuries long history of crystal

All EBB & FLOW crystal pieces are produced in Czech Republic. A place where crystal has a centuries long history carried by craftspeople. Initially, lead was used to add clarity and finesse to crystal, making it soft and easier to cut. For many years, this is how crystal was made. Today, crystal is produced without lead, yet with the same properties as before, the weight and clarity unchanged. Every crystal product is cut by hand, elevating the uniqueness and impressive craftsmanship from start to finish.

Horizon

As a design Horizon is wonderfully versatile with its options as a pendant, wall lamp and surface lamp.

Horizon Golden Smoke (M)

Horizon Pendant

Design: Susanne Nielsen

Designed in 2017 and launched in January 2018.

Rowan

Classic & timeless

"To me, Rowan is like an old friend. You don't need to explain so much, you just pick up where you left last time you met."

"Being the first EBB & FLOW design, Rowan takes pride of place above my own dining table"

Susanne Nielsen,
Designer

Rowan Pedant, Bright Coral
